

# EDIBLES

## Beans

**Gold Rush** - yellow wax bush bean with heavy yields. Fine flavor, excellent fresh or frozen. 54 days.

## Cabbage

**Fast Vantage** - Medium green, early season variety. Very uniform, with 2-1/2 lb heads. 59 days.

**Red Acre** - Round, red cabbage yielding up to 3 lb heads. 80 days.

## Cauliflower

**Snow Crown** - Pure white, round smooth heads weigh more than 2 lbs. Excellent quality; vigorous uniform plants. 50 days.

## Celery

**Giant Pascal** - Produces long, thick stalks which are not brittle. 11-12" stalks are bright green and slow to pith. 100-110 days.

## Cucumber

**Beit Alpha** - An open pollinated burpless cucumber that is nearly spineless and produces 12" fruit that is sweet, crunchy, and bitter free. Can be harvested at 5-6" for pickling and salads. 56 days.

**Pick a Bushel** - AAS Winner. Compact container variety bears loads of sweet cukes that can be harvested small for gherkins or grown to 6" for slicing. Semi-bush plant, reaching a height of only 12" with a spread of 30". Good garden performance and disease resistance. 45 days.

**Slice More** - High yields of smooth, long, dark green slicing cukes. Fruits up to 8.5". 63 days.

## Lettuce

**Black Seeded Simpson** - Popular home garden loose leaf variety. Large, light green leaves with ruffled edges. 45 days.

**Buttercrunch** - A long time favorite with leaves that are juicy and crisp. Performs well in warm growing areas. Bibb type. 65 days.

**Great Lakes 659** - Iceberg type lettuce with outstanding tip-burn resistance. Good in cool or warm conditions. Produces solid, large, dark green heads. Slow to bolt. 80-90 days.

**Mesclun Baby Leaf** - An assortment of colors, shapes, and textures. Includes romaine, oak leaf, and curled types. 50-55 days for mature leaves or only 28 days for baby leaves.

**Parris Island Cos** - Excellent romaine type. Intense, dark green color and tall, erect habit. 74 days.

## Peas

**Green Arrow** - Plump 4" long green pods packed with up to 11 peas. Grows 24-28". Disease resistant. Good for freezing. 70 days.

**Sugar Lace** - Stringless, edible pod peas are sweet and prolific. Compact habit, only 30" tall, may be grown without support. 68 days

## Pepper

**Cali Wonderful** - F1 hybrid. A uniform green to red mid-season variety whose blocky fruits are very nearly square, measuring 4-1/2" top to bottom and side to side. The three to four lobed fruits are thick-walled, crisp and firm, even when matured fully red. Excellent disease resistance - bacterial spot races 1,2, and 3, TMY, and PVY. 72-77 days.

**Jalapeno M** - This thick-walled and juicy dark green to red pepper produces a fiery hot, pungent flavor. The fruits are 3 x 1" and tapered. If the peppers are green at the end of the season you can pull up the entire plant and hang it in a dry spot to finish ripening the fruit. Height 24-36". 75 days.

**New Ace Hybrid** - Extra early, this sweet and tender blocky pepper matures from green to crimson. Produces mostly three-lobed fruit with abundant and continuous fruiting. Good vigor and wall thickness. It's habit prevents sunscald. TMV resistant. 60 days.

**Sweet Banana** - (Sweet Hungarian) - Large fruits with thick walls; light yellow deepening to orange at maturity. Nicely tapered 7" x 2" fruits are ideal for fresh markets, gardening, and pickling. Popular for frying. Strong growing and widely adapted. 68 days.

## Strawberry

**Fragoo** - An ornamental plant with sweet-flavored berries. Day neutral, everbearing, hardy to Zone 5, will make attractive runners up to 3 ft long. Excellent for pots, baskets and mixed containers. Height 4-6". 90-100 days.

- **Deep Rose**
- **White**

## Summer Squash

**Multipik** - Yellow, straightneck squash. Golden yellow fruit borne early on very prolific plants. 7.5-8 in. fruits, 50 days.

## Swiss Chard

**Bright Lights** - AAS Winner. Beautiful rainbow-colored stalks light up landscapes or mixed containers as well as serving up tasty veggies. Mild flavor, tender green or bronzy leaves. 60 days.

## Tomato

**Beefmaster** - Strong vines yield large quantities of beefsteak type tomatoes up to 2 lbs. A real mouth-watering, large, deep red, full flavored tomato! Indeterminate. Disease resistance = V, F1, N, A, St. 80 days.

**Better Boy** - Deep red, globe shaped fruits average 16 oz.; very meaty interior. Plants provide plenty of foliage cover. Indeterminate; Disease resistance = V, F1, N, A, St. 75 days.

**Burpee Big Boy** - Large 1-2 lb deep globe shaped fruits. Firm scarlet red tomatoes have thick walls and exceptional flavor. A favorite! Indeterminate. 78 days.

**Celebrity** - AAS Winner. Highly productive performer under a wide range of growing conditions throughout the country. Large 8 oz firm and flavorful 3-1/2" fruits are resistant to a broad range of diseases. An excellent home garden variety. Determinate. Disease resistance = V, F1, F2, N, TMV, A, St. 75 days.

TOMATO CELEBRITY

TOMATO EARLY GIRL

**Early Girl** - Early slicing tomato yields a prolific crop of 4-6 oz globular fruits all summer. Rich red. Indeterminate. Disease resistance = V, F1, F2. 57 days.

**La Roma III** - Large, tasty, paste tomato on vigorous plants. 5-8 oz fruits, Determinate. Disease resistance = A, St, N, V, F. 76 days.

TOMATO LA ROMA III

TOMATO PATIO

**Patio** - Very Compact and early for patio pots or small gardens. 3-4 oz fruits are firm and brightly colored. Determinate. Disease resistance = V, F1, F2. 65-68 days.

**Rutgers** - Popular old fashioned open pollinated variety. Smooth, firm 5 oz fruits. Indeterminate. Disease resistance = V, N, F1. 78 days.

**Super Sweet 100** - Early-season, home gardener favorite. This staking variety has tasty, round cherry tomatoes that are jointed with green shoulders. Harvest lasts several months as blossoms and fruit develop progressively. Indeterminate. 62 days.

TOMATO RUTGERS

TOMATO SUPER SWEET 100

TOMATO SWEET N NEAT SCARLET
