

FRUIT

Actinidia kolomikta

Red Beauty Hardy Kiwi

This twining vine is super hardy but produces a fruit most associate with the tropics - Kiwis! Since the Hardy Kiwi plant is dioecious, meaning there are separate male and female plants, all you need for fruit is to plant 'Red Beauty' near 'Arctic Beauty' (a male selection) and you will have a cool crop of miniature kiwi's for fruit salads, or they are delicious right off the vine. The skin is thin and the entire fruit can be eaten similar to a grape. The green foliage turns a nice red in the fall adding to its ornamental value as well.

- Hardiness Zone: 3-8
- Height: 12-15 Feet
- Spread: 12-15 Feet
- *Female*
- **Partial Sun/Full Sun**

FUJI APPLE

Malus X

Fuji Apple

Semi-dwarf. A crisp and juicy apple that ripens in October and keeps very well in storage. The flesh is sweet and crisp and the light green skin with red blush is very attractive. Vigorous and productive, this variety was developed in Japan and it's outstanding for fresh eating. Pollinate with any mid-season blooming apple.

- Hardiness Zone: 5-8
- Height: 12-16 Feet
- Spread: 10-15 Feet
- *Pollinate with any mid-season blooming apple*
- **Full Sun**

Honeycrisp Apple

Semi-dwarf. Great for taste and even better for storage, this sweet-flavored late season selection retains its crispness even after seven months of storage! 'Honeycrisp' is not only becoming an orchard favorite, it is becoming a "must have" tree for the home fruit garden because of its versatility, taste and productivity as well as its remarkable ability to stay crisp for months.

- Hardiness Zone: 3-8
- Height: 12-16 feet
- Spread: 10-15 feet
- *Pollinate with similarly zoned apple*
- **Full Sun**

Macoun Apple

Semi-dwarf. A favorite New England variety, this mid-season apple needs no introduction. Exceptionally high quality fruit are dark red and firm. Considered by many the best overall apple for fresh eating. Mid-season bloom.

- Hardiness Zone: 4-8
- Height: 12-15 Feet
- Spread: 12-15 Feet
- *Pollinate with similarly zoned apple*
- **Full Sun**

RED BEAUTY HARDY KIW

HONEYCRISP APPLE

MACOUN APPLE

MCINTOSH APPLE

McIntosh Apple

Semi-dwarf. This apple has been around for 125 years and is still one of the most popular apples in the northeast. A very productive tree which yields medium-sized, bright red fruit with green background. With a tender, thin skin, these apples are good for fresh eating or cooking. Blooms mid-season and is self-fertile.

- Hardiness Zone: 4-8
- Height: 12-15 Feet
- Spread: 12-15 Feet
- *Self-Pollinating*
- **Full Sun**

Royal Gala Apple

Semi-dwarf. A deep red apple with sweet, crisp flesh that is perfect for both eating or cooking. Matures two weeks earlier than 'Red Delicious' and blooms in mid-season.

- Hardiness Zone: 4-8
- Height: 12-16 ft
- Spread: 10-15 feet
- *Pollinate with similarly zoned apple*
- **Full Sun**

ROYAL GALA APPLE

4-in-1 Cold Climate Apple/3-in-1 Cold Climate Apple

So you want to grow apples in your home edible garden but you don't have room for more than one tree and the guy at the garden center says you need at least 2 varieties to pollinate and get fruit?? Why not try a single tree that combines 4 varieties of apples on the same single tree? All your pollination and space concerns will melt away with the 4-in-1 cold climate apple is created from grafting from an assorted selection of cold climate hardy apples. These are the varieties that are used in the grafting: Braeburn, Cortland, Fuji, Gala, Granny Smith, Gravenstein, Jonagold, Jonathon, Melrose, Red Delicious, Red McIntosh, Spartan, Yellow Delicious, Yellow Transparent, and Winesap. Four of these varieties are grafted on the same plant!! Get ready for a bountiful harvest and outstanding variety all for the price of one....that's a bargain in any economy!

- Hardiness Zone: 4-8
- Height: 12-15 Feet
- Spread: 12-15 Feet
- *Self-Pollinating*
- **Full Sun**

4-IN-1 / 3-IN-1 COLD CLIMATE APPLE

Prunus

Contender Peach

It's true. Peach selection can be difficult if you are looking to raise them in a home orchard in the far north. Good thing 'Contender' is available to give you a great tasting peach that will shrug off your Zone 4 winters. This late July maturing, freestone peach will thrill you with its big size, its tasty juiciness and its ability to produce loads of these red blushed yellow fruit that are equally good fresh as they are canned or preserved for later use. 'Contender' is self-fruitful, easy to grow and a sure way to make your northern backyard feel like it's a little further south!

- Hardiness Zone: 4-8
- Height: 10-12 Feet
- Spread: 10-12 Feet
- *Self-Pollinating*
- **Full Sun**

CONTENDER PEACH

Sweet Cherry Pie Cherry

From Wisconsin orchardist Bill Eubank, this new cherry tree has the sweetest tasting cherries we have ever sampled. Although it is not quite sweet enough for fresh eating like a Bing, the cherries from the Sweet Cherry Pie™ tree are fantastic for jams, jellies and pies. Imagine being able to pick cherries in your back yard for homemade summer pies! Hardy to Zone 4, even northern gardeners can grow homemade fruit. With its relatively compact size, growing to 15', this is a great tree for a home garden or small orchard.

- Hardiness Zone: 4-7
- Height: 13-15 ft
- Spread: 10-12 ft
- *Self-Pollinating*
- **Full Sun**

SWEET CHERRY PIE CHERRY

Prunus X

Montmorency Cherry

A plant with a storied American history, 'Montmorency' is, by far, the most widely grown 'sour cherry' or 'pie cherry' tree in America with nearly 100 years of fruiting history. Vigorous growing, 'Montmorency' is a heavy spring bloomer with clouds of small white, fragrant flowers followed up by a bumper crop of sizable cherries that mature in July and August. Perfect for pies and baked goods, these cherries are also quite good eating fresh especially if left on the tree until almost overripe to attain the highest sugar content possible. Once picked, the fruit doesn't last long but its perfect for preserves and jams. Self-fruitful.

- Hardiness Zone: 3-8
- Height: 12-20 Feet
- Spread: 12-20 Feet
- *Self-Pollinating*
- **Full Sun**

MONTMORENCY CHERRY

STELLA SWEET CHERRY

Stella Sweet Cherry

Large, heart-shaped, dark red fruit are produced on this self-pollinating sweet cherry. Sweet, rich flavor on a vigorous, productive tree make this an excellent choice. Moderate crack resistance. Can pollinate other sweet cherries.

- Hardiness Zone: 5-8
- Height: 18-20 Feet
- Spread: 18-20 Feet
- *Self-Pollinating*
- **Full Sun**

Pyrus X

Red Bartlett Pear

This Aussie created selection arrived on US shores in 1959 and has been a backyard fruiting favorite ever since. It's easy to see why with its great fruit size, taste and versatility. This big, deep red skinned Pear matures starting in late August and continuing into late September producing a fruit that is very sweet and juicy with a white flesh that delivers a bit of grittiness that adds to the eating experience without being bothersome. 'Red Bartlett' is very productive and very easy to store for later use in baking projects and is one of the ideal Pears for canning. 'Red Bartlett' can be pollinated by any other non-Asian Pear.

- Hardiness Zone: 4-8
- Height: 15-18 Feet
- Spread: 10-12 Feet
- *Pollinate with similarly zoned non-Asian Pear*
- **Full Sun**

RED BARTLETT PEAR

Rubus

Black Satin Thornless Blackberry

You'll hardly be able to stand the anticipation while waiting to pick the first ripe berries from this selection of Thornless Blackberry!! When early August rolls around, it will be hard not to keep from salivating just at the thought of these large, jet black, tasty berries. The fruit is only the end product of a plant that is one of the best of its type for the home edible garden. 'Black Satin' is vigorous and pest free making it extremely easy to grow in your garden. The thorn-free stems make picking a friendly, bloodless job that will reward you with oodles of berries on each stem, all of them in danger of never making it into the house since their great taste will have you eating while you pick! 'Black Satin' will love a sunny spot with well-drained soil and will only ask you for enough room to spread so it can offer you its bountiful yield.

- Hardiness Zone: 4-8
- Height: 5-7 Feet
- Spread: 5-7 Feet
- *Self-Pollinating, more productive when planted with another variety*
- **Full Sun**

BLACK SATIN THORNLESS BLACKBERRY

Caroline Raspberry

Vigorous and productive, this selection of red raspberry sets the standard in its grouping for the best in fruit size and productivity. You will never come back in the house empty handed during the late July through August harvest period of this plant unless you eat everything you pick before you come in! That's a distinct possibility considering how highly sugared the berries are... even with the massive quantities this plant produces, you may want to wolf them down before waiting to bring them in to share! 'Caroline' is a fast grower and will ramble so give it some room in any sunny or partially shaded location with good drainage.

- Hardiness Zone: 4-8
- Height: 4-6 Feet
- Spread: 4-6 Feet
- *Self-Pollinating, more productive when planted with another variety*
- **Full Sun**

CAROLINE RASPBERRY

Heritage Red Raspberry

Red raspberry with flavorful fruit, producing one crop in mid July and another in early September. Flesh stays firm even when over-ripe.

- Hardiness Zone: 4-8
- Height: 5-7 Feet
- Spread: 5-7 Feet
- *Self-Pollinating*
- **Partial Sun/Full Sun**

HERITAGE RED RASPBERRY

Polana Raspberry

The worst thing about raising everbearing raspberries would have to be an early frost, especially in colder, northern areas. While 'Heritage' is the standard bearer for everbearing raspberries, 'Polana' is better as you go further north with late season fruit ripening up to 3 weeks earlier than 'Heritage', offering you a long season of luscious, large, glossy red berries without the worry of losing them to frost just as they are hitting their prime. Tasty! easy to grow and raspberries in July and again in late August... it's a home fruit grower's dream!!

- Hardiness Zone: 3-8
- Height: 5-7 Feet
- Spread: 5-7 Feet
- *Pollinate with similarly zoned variety*
- **Full Sun**

POLANA RASPBERRY

REKA Highbush BLUEBERRY

JERSEY BLUEBERRY

PATRIOT BLUEBERRY

Vaccinium corymbosum

Reka Highbush Blueberry

You'll be shouting "U-reka" as you start off the Blueberry picking season with a bang with this superlative introduction from New Zealand. There is nothing like picking your own fresh Blueberries and 'Reka' is the perfect plant for getting all that picking started with masses of medium-sized, rich flavored berries that you'll say are the best you've ever tasted. Will you be saying that because they are the first fresh ones you've tasted since last year?? Who knows but they are outstanding for eating right off the plant or fresh for breakfast, lunch or dessert! 'Reka', like all Blueberries, is easy to grow wanting full sun, moist, well-drained soil, and little else. Because of its early fruit, it will bloom slightly earlier in May meaning you may need to protect flowers from frost on cold nights along with protecting ripe fruit from your local birds who will be looking forward to picking 'Reka' in early July as much as you!

- Hardiness Zone: 4-7
- Height: 4-6 ft
- Spread: 4-6 ft
- *Semi Self-Pollinating, Pollinate with similarly zoned highbush variety*
- **Full Sun**

Jersey Blueberry

Big, burly, and productive, 'Jersey' is an old time variety that keeps on growing! 'Jersey' is laden with huge numbers of small- to medium-sized, sweet, dark blue fruit late in the season and is a consistent producer of perfect fresh eating or pie berries year after year.

- Hardiness Zone: 4-8
- Height: 6-7 Feet
- Spread: 6-7 Feet
- *Self-Pollinating*
- **Full Sun**

Patriot Blueberry

We think this selection may be the best early season producer out there! Which other variety will give you such massive yields in such dense, rounded, compact package? 'Patriot' isn't only an incredible fruiting plant, it's an incredible landscape plant with superb, lustrous, deep green foliage and a fiery orange-red fall color that will stop you in your tracks!

- Hardiness Zone: 3-8
- Height: 4-5 Feet
- Spread: 4-5 Feet
- *Self-Pollinating, more productive when planted with another variety*
- **Full Sun**

Polaris Blueberry

Another small space wonder, 'Polaris' will thrill with its tight form, heavy producing ability and sweet, sweet berry taste. 'Polaris' is known as a 'half-high' type of Blueberry, combining the denseness of lowbush selections with the fruit size and larger berry yields of the highbush selections. The result is a plant that will cover itself with fragrant, white, bell shaped flowers in early May and with medium sized, powder blue, aromatic, extremely sweet tasting fruit in late July and early August. It is one of the earliest maturing of the Blueberries meaning that you might have to fight off more than the birds for its sweet fruit as hungry family members will be looking to outwit you for their year's first taste of fresh Blueberries! 'Polaris' is such a low maintenance plant and will even reward you and your garden with brilliant orange-red fall foliage color!

- Hardiness Zone: 3-8
- Height: 3-4 Feet
- Spread: 3-4 Feet
- *Self-Pollinating, more productive when planted with another variety*
- **Full Sun**

Vaccinium angustifolium X

Jelly Bean Blueberry

Everyone is looking for a dwarf Blueberry to use in the landscape but the varieties available invariably disappoint due to poor fruiting or poor growing. Jelly Bean® changes all that in the form of a dense, compact, small leaved plant that produces masses of medium sized, dark blue, incredibly tasty blue berries in July and early August. It is so prolific and such an easy care, easy to grow plant that you won't know where to use it first, grouped to form a fruiting small, formal hedge in any sunny garden or in a container where you can pick right from your back door. Add in spectacular fall foliage color and you have a small Blueberry that will be a big winner in your garden.

- Hardiness Zone: 4-8
- Height: 1-2 Feet
- Spread: 1-2 Feet
- *Self-Pollinating, more productive when planted with another variety*
- **Full Sun**

POLARIS BLUEBERRY

JELLY BEAN BLUEBERRY

CONCORD SEEDLESS GRAPE

Vitis

Concord Seedless Grape

Dependability is without question on this easy to grow vine that will give you gobs of deep purple, sweet Grapes that have the added pleasure of being seedless. There may be no other Grape as multi-purpose for you to grow in your edible garden as it's spectacular for fresh eating when harvest time rolls around in early to mid-September or can be used in jellies and preserves with equal success. Like all heavy, woody vines, be sure to grow this selection with a strong wooded trellis or arbor for support in order to assure the best fruiting and health of the plant.

- Hardiness Zone: 4-8
- Height: 4-5 Feet
- Spread: 18-24 Inches
- *Self-Pollinating, more productive when planted with another variety*
- **Full Sun**

Reliance Grape

A superb red seedless selection, this introduction features sweet flavored, medium to large clusters of berries. Vigorous, relatively disease resistant, mid-season ripening.

- Hardiness Zone: 4-8
- Height: 4-5 Feet
- Spread: 18-24 Inches
- *Self-Pollinating, more productive when planted with another variety*
- **Full Sun**

RELIANCE GRAPE
